Human Considerations

The experiment for this research involved participants on Mechanical Turk, so these human participants are key stakeholders (Boland & Queen, 2016a, Method). This research was conducted under the guidance of an institutional review board (IRB), with the expectation that participants would not be identified or put at risk; the IRB also urged the researchers to refer to the "generally accepted principles of responsible and ethical conduct of research" (Boland & Queen, 2016b, S2 Appendix.pdf).

Preservation Considerations

CSV files can be opened by any text editor or compatible program. DOCX and PDF files, while proprietary file formats, can be opened by most word processing apps, web browsers, and a variety of other programs. In terms of file format and access, it's likely that these formats will continue to be accessible for some time.
